

# Southern Maine Review Special Edition 2005

## *The Creative Economy in Maine: Measurement & Analysis*

Eight case studies of the creative economy in small New England cities and communities yield a series of learnings about its growth and a related community development model (the "ACE" model). Eight policy recommendations are offered to enhance and accelerate development of the creative economy at the local, regional, and state levels. It concludes that the creative economy in Maine is large and growing and, in fact, represents the leading edge of economic growth in the state.
